The profitability of the Company for the year under review appears less, the reason being the profit on the sale of shares in the previous year and dividend not received on it in the current year. International Markets were not favourable and disappointments on macro front locally were the major factors affecting the capital markets. In order to control high inflation, RBI has continued tighter monetary policies resulting in higher interest rates on the borrowings by the various Companies affecting their margins. The economy has grown by about 5% in 2013-2014 and RBI has pegged the GDP growth for the current fiscal year at the same level.

xiii. Assets acquired under lease

Operating Lease:

Where the Company is lessee

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

Where the Company is the lessor

Leases in which the Company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating leases are included in fixed assets. Lease income on an operating lease is recognized in the statement of profit and loss on a straight-line basis over the lease term. Costs, including depreciation, are recognized as an expense in the statement of profit and loss. Initial direct costs such as legal costs, brokerage costs, etc. are recognized immediately in the statement of profit and loss.

xiv. Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

xv. Provision

A provision is recognized when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

All other investments are classified as Non Current/ long-term investments. Current investments are carried at lower of cost and fair value determined on an individual investment basis.
- b) Long-term investments are valued at cost, i.e. book value of the investments as reflected in the financial statements as on 31st March, 2003 and for subsequent diminution, provision is made by way of adjustment against Investment Reserve (created in earlier years by revaluation of quoted investments) in terms of scheme of Arrangement sanctioned by the Hon'ble Calcutta High Court during an earlier year. Provision for diminution in value is made to recognise a decline other than temporary in the value of the investments.

Notes to Consolidated Financial Statements as at and for the year ended 31st March 2014

Investment property

An investment in land or buildings, which is not intended to be occupied substantially for use by, or in the operations of, the company, is classified as investment property. Investment properties are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the investment property to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Depreciation on building component of investment property is calculated on a straight-line basis using the rate arrived at based on the useful life estimated by the management, or that prescribed under the Schedule XIV to the Companies Act, 1956, whichever is higher.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of profit and loss.

x. Cash & Cash Equivalents

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand and short term investments with an original maturity of three months or less.

xi. Provision for Retirement benefits

- a) Retirement benefits in the form of Provident Fund and Superannuation are defined contribution schemes and the contributions are charged to statement of Profit and Loss of the year when the contributions to the respective funds are due. There are no obligations other than the contribution payable to the respective funds.
- b) Gratuity liability is a defined benefit obligation and is provided for on the basis of an actuarial valuation on projected unit credit method made at the end of each financial year.
- c) Short term compensated absences are provided for based on estimates. The Company treats accumulated leaves expected to be carried forward beyond twelve months, as long term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the end of each financial year. The company does not have an unconditional right to defer its settlement for the period beyond 12 months and accordingly entire leave liability is shown as current liability.
- d) Actuarial gains/losses are immediately taken to statement of profit and loss and are not deferred.

xii. Earning per share

Basic earning per share is calculated by dividing the net Profit or Loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

Notes to Consolidated Financial Statements as at and for the year ended 31st March 2014

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

xiii. Income Taxes

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income Tax Act, 1961. Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

The deferred tax for timing differences between the book and tax profits for the year is accounted for using the tax rates and laws that have been substantially enacted as of the Balance Sheet date. Deferred tax assets are recognised only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. If the company has carry forward unabsorbed depreciation and tax losses, deferred tax assets are recognized only to the extent there is virtual certainty supported by convincing evidence that sufficient taxable income will be available against which such deferred tax asset can be realized.

At each balance sheet date the Company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax assets to the extent it has become reasonably certain or virtual certain, as the case may be that sufficient future taxable income will be available against which such deferred tax asset can be realized.

The carrying amount of deferred tax assets is reviewed at each balance sheet date. The company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realised. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

Minimum Alternate tax paid in a year is charged to the Statement of Profit & Loss as current tax. The Company recognise MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i.e the period for which MAT Credit is allowed to be carried forward. In the year in which the Company recognizes MAT Credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternate Tax under the Income Tax Act, 1961 the said asset is created by way of credit to the statement of profit & loss and shown as "MAT Credit entitlement". The Company reviews the "MAT Credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

Notes to Consolidated Financial Statements as at and for the year ended 31st March 2014

Exchange differences on such contracts are recognized in the statement of profit and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognized as income or expense for the year.

xv. Assets acquired under lease

Where the Company is lessee

Leases, where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item, are classified as operating leases. Operating lease payments are recognized as an expense in the statement of profit and loss on a straight-line basis over the lease term.

Where the Company is the lessor

Leases in which the Company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating leases are included in fixed assets. Lease income on an operating lease is recognized in the statement of profit and loss on a straight-line basis over the lease term. Notes to Consolidated Financial Statements as at and for the year ended 31st March 2014

xvi. Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

xvii. Provision

A provision is recognized when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.
